Fundamentals**

**Overview of Important
Protocols**

**Network Management
Approaches**

Network Security Principles

Aug 4, 2026

Atharv Vinayak Kulkarni

has successfully completed the online Specialization

Network Fundamentals

This Specialization builds a strong foundation in key networking concepts, terminology, and architectures essential for modern IT roles. Learners will explore topics such as network segmentation, routing policies, access-lists, and traffic forwarding, equipping them to work confidently alongside network professionals. Developed in collaboration with industry experts, this program prepares participants to effectively support and interact with networked systems across diverse IT environments.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
